

SR-6000 / SR-6000-IR

INFRATECH
AUTOMOTIVE

SHORT WAVE PORTABLE INFRARED EQUIPMENT

- Exclusive New Iridium Enhanced Quartz Halogen Element
- 6,000 Watts of short wave Infrared
- Speeds curing time 60% to 80% faster
- 4' x 6' coverage area
- Solid state programmable control
- Infrared Sensor provides precise control
- Energy efficient
- UL Listed

These all new systems offer what maybe the most important short wave curing advancement in decades. Infratech's exclusive new Iridium elements. Recently declassified military technology which Infratech has been a part of for 50 years, puts more energy into the work and less into visible light. These unique, new, highly efficient short wave infrared curing units increase curing efficiency and outperform other systems. 6,000 watts of power and 240 volts offers faster cure times by 60% to 80%. These units have solid state programmable controls with electronic timer, a coverage area of 4' x 6', adjustable shock arm which extends to 7' and comes equipped with a 25' power cord. Stand has locking casters and a narrow footprint for mobility. The SR-6000 IR has the same quality features as the SR-6000 but includes an infrared sensor that allows the technician to select and maintain a predetermined surface temperature until the curing is complete. Digital controls provide complete accuracy and are easy to setup and operate. When you need the efficient high heat of Iridium short wave infrared, you can depend on Infratech for the performance, durability and reliability that you cannot find anywhere else. UL listed

SPECIFICATIONS

| MODEL # | SR-6000 | SR-6000 IR |
|-----------------|----------|------------|
| PART # | 17-1300 | 17-1350 |
| VOLTS | 240—1 PH | 240—1 PH |
| AMPS | 25 | 25 |
| WATTS | 6,000 | 6,000 |
| SHIPPING WEIGHT | 185 lbs | 185 lbs |
| LENGTH | 36" | 36" |
