

Food Warmer

INFRATECH™
a SEACHROME company

Designed for continuous duty, the Infratech Commercial Quality Food Warmer is fabricated out of 300 Series stainless steel for long life and easy cleaning. Each Food Warmer includes an intensity control, pilot light, and 6-foot cord. Optional equipment includes an Under Shelf Sliding Bracket and a Counter Top Stand*.

The Infratech Food Warmer uses medium wave quartz infrared technology to keep the food warm without browning or drying out. This technology has been used for years in commercial kitchens and restaurants with great success. The Infratech unit has been designed to be compatible with consumer use in homes and on patios.
